

ASSEMBLY AND MAINTENANCE OF A DIAPHRAGM PUMP

DL PSM05

This mounting kit allows the assembly and maintenance of a diaphragm pump.

The absence of leaks in this type of pumps allows its use for the transport of aggressive, dangerous, or toxic liquids, and for this reason they are commonly used in the chemical industry.

Thanks to the cutting, the students can learn all the components of the pump and its operation.

The material is supplied stored and protected in a transport box together with the tools necessary for its use.

The user manual, supplied with the equipment, shows clearly and with many images, the entire process to follow for operating the equipment.

TRAINING OBJECTIVES

The practice's manual contains the necessary instructions for assembly and disassembly of the device, as well as necessary guidelines for carrying out its maintenance and repair.

PUMP'S CHARACTERISTICS

- Capacity: from 5.5 l/h,
- Maximum pressure: 10 bar,
- Number of careers: 58 careers/min,
- Diameter of diaphragm: 64,
- Career length: 2 mm.
